

Dear

Hello I am SAO NON and I'm 17 years old
I am a fifth member in the family. when
I was young in my home town my family occupatio
n it is very hard. when my brother, sister and I
were young, my father goes to do the job
from sunrise - sunset and got only one can
of rice and all the member get the meal
only a egg in a day, so when we find in the
morning we can eat only in the morning
when we find in the evening we can eat
only in the evening. and some days we didn't
have rice to get. too, my sister is SA AM
she is 23. when she was young she studied
in grade 4, because of the poore and doesn't
have money for her studying and she decided to
stop and my brother is CHAN NY and he's
22, when he was young he is a good student

he got the score very well from teacher and his grade is number 1 every year. but he doesn't have a good clothes. like other student his sweater and trouser is a tatter clothes but, all teachers really like him very much and he never had the money eventhough 1 nrel for go to study. so he gave up his studying in primmary school, because he thought that he can't go to study at se coun Dary and my sister is CHARITY and my brother is CHARVET they are the same.

For me, when I was young every times that I go to school it is very har for me I always go to school by walk and I don't have enough stantionary like clothes, book, and shoes when I go to school I always borrow my friend's shoes and in aday I can get the money only 1 nrel, when I got money 3 nrel I bring it to study extra class. Sooner later my father moved the house come to live here. in the first time I don't have anything so, my father decided to

T, 1

climb in the mountain to carry the prize wood when he got some money, He built a house and bought a battery and a bike, my life style was different from other student, including studying, living, spending money. For living I never have a free time like other, at day I carry the water into the jar but English still in my mind abiding, at night I go to catch frog, bull frog, crab and snail, too, but remind the English word abiding, I go to school by riding bike so, I am very tired because the school very far from my house, for studying I am scarce a lot of stationary like book, clothes shoes, English books, when I see other student study extra classes, I always think that "why I can not study extra classes like them? Can I know English like them? I thought it maybe can not, so I wanted to know English very much but I don't have any money pay for it For spending: when I go to school I don't have any money pay for study extra classes

like other student, but, I am very lucky because my English teacher is pety me and he got me to study by free in three years ago, in the during 3 years ago, my teacher always help me like English books for school and English book for extra classer and give me some advises, too, He is seem my brother, however it can't make me countinue studying at high school because my parents don't have any money for my studying. But, thereafter I got a good information from my teacher I am going to get the scholarship from you, and can countinue studying because of my teacher at asked you, so, I am very excited so much, because I can go to study at high school, my perpose in the future, I want to be a good doctor because, when I became a doctor I can earn much money and can help many people that got sickness and can help my country in the development, too, I really like you and my teacher very much. Because in during 3 years ago, when I was a student in private secondary, I am scarce money and start, a ary like, books, notebook English books, clothes. For money I don't any money, like other student.

student, but I think that I spend much money. in a day at school I spend 3000 riel, 2000 riel for getting the meal, 1000 riel for drinking water after got the meal already, but I got the meal it isn't full. Other students they are a richer student that's wise they spend much money. I know in a day they spend about 5000 riel - 10000 riel up, they have new cloth and new motor, but for me have only an old bike I never have new clothes, and I don't have any money to buy some stationary, like, English books for state school and English book for extra classes, but my teacher give me free and he always advises me, so these factors that make me love him very much.

Finally I still thank you very much
Do you know? every day although I am busy but I never absent for school, so you shouldn't worry about me.

I hope that I can meet you again in next year. Do you know? these day I still encounter with the poor, so my brother decided to find

job to do in phnom penh to earn brokerage for my family, although my family still encounter with endless poor, but I still think about studying abiding. I never waste that time because I know that it can conducive my studying get the flank and I expect that I can study at university, as well, This is my confidence.

Do you know? some my friends they have much money they are richer's student they have motor but they still give up there studying and they only said that I am very bored although I try to forbid them, it isn't cannot, my farm near the mountant, so, it perhaps 15 km from my house and a few days ago I walked over there to prepare the farm and wanted to plant something when I returned and got a fever, but when I went over there, I always bring a booklet go to over there as well, sometime my lunch and dinner had only boil crab or snail, but I never think about it crab or bull frog I can eat the same, but the thing that I should think is about my studying

and I always asked myself How can I get the money for my studying? I always worry very much about it. Because my family doesn't have enough food or rice and I depend on my parent it cannot. Because my parent cannot earn the money. Because they are old, as well, so, my life it is very hard. my living are also very hard. my eating are also very hard and although I want to study it is also very hard, in these letters, are only some small things and some difficult thing else I can not write onto these letters. my parent hope that I can go to study at college and become a doctor but I hope only high school it is enough for me.

Thank you very much for your scholarship. I would wish you good luck, good health, good long life and encounter about happiness in the family, good bye

SHO NON
